Office of Community Health and Research at the University of Arkansas for Medical Sciences – Northwest Campus: Emily English, Kelly Dundon, Julian Thomas, Christopher Long, Tanvangi Tiwari, and Katarina Noori.

EXECUTIVE SUMMARY

The Local Food, Farms, and Jobs Act (Local Food Act) was enacted in 2017 and amended in 2019 to create, strengthen, and expand local farm and food economies throughout the state. The Local Food Act requires institutions to set a goal of at least 20% of the institution's¹ purchases of food products be spent on local food, and it requires institutions to provide information on their local² food procurement budget.

A total of 1,267 institutions were identified to receive the reporting form because they received funding from the state or offered a food service program. Of those institutions, 612 respondents (48.3%) completed the form's initial screening questions to determine if they met the criteria to complete a full report, and 655 (51.7%) institutions did not start the screening questions. Of the 612 institution respondents, 484 (79.1%) met the criteria for reporting, and 128 (20.9%) did not meet the criteria for reporting because they did not receive state funding, did not operate a food service program, or both. Of the 484 respondents who met the criteria for reporting, 484 (100.0%) completed the report and 0 (0.0%) partially completed the report. Respondents used information from fiscal year 2022 (FY2022).

The following list provides an overview of the information reported by institutions. For more information, please read the full 2022 Local Food, Farms, and Jobs Act Annual Report that follows.

- The total food budget was reported by 484 institutions, and the median³ of the range of responses was \$229,388. All responses together totaled \$241,425,150.00.
- A total of 411 institutions reported purchasing local food products, an increase from 314 institutions in 2021.
- The median of the range spent on local food for all eligible respondents was \$37,056.61. All responses together totaled \$53,450,164.00 spent on local food.

- The median percentage of the total food budget spent on local food for all eligible respondents was 16.6%.
- A total of 207 institutions reported meeting the Local Food, Farms, and Jobs Act goal of 20% or more of their local food budget spent on local food.
- The vendors used to purchase local farm and food products were distributors/wholesalers, farms, grocers, processors, and others. The two vendors most frequently reported by respondents were Hiland Dairy and Sysco.
- The most common farm and food products reported were chicken, milk, ground beef, and pork.
- To purchase and procure local products, respondents identified that they intend to work with a broadline or wholesale distributor (74.7%) and intend to work directly with a farmer, producer, or processor (27.1%).
- Institutions reported being most interested in purchasing vegetables (80.2%) and dairy (74.8%).
- Institutions reported obtaining higher quality products and meeting the requirements of the Local Food Act as the largest motivators to purchase local foods.
- Institutions reported lack of supply and higher costs for local food and/or farm products as the largest barriers to purchasing local farm and/or food products.

1. Institute of higher education (college, university), school district, early childhood education facility, state agency or other entity of the state, medicaid funded/provider (senior care center, residential treatment facility, skilled nursing facility, etc.), public library, and other designees under contract within Arkansas.

2. Food products that are grown in Arkansas, packaged and processed in Arkansas, and/or both.

3. The median is included in this report as a general representation of the central measure or middle number if the values were lined up sequentially from smallest to largest. Mean (also known as average) was not included because of the wide range in the reach and size of the institutions reporting.

BACKGROUND

The Local Food, Farms, and Jobs Act (Local Food Act) was enacted in 2017 to create, strengthen, and expand local farm and food economies throughout the state. The Local Food Act also intended to support and encourage the procurement of local farm or food products as a significant portion of all food products.

The Local Food Act of 2017, codified at A.C.A. 15-4-3801, required institutions that received at least \$25,000 from the state of Arkansas for the purchase of food products to set a goal to ensure that 10% of the amount budgeted for food purchases in fiscal year 2018 was spent on local farm and food products. The goal increased to at least 20% for subsequent fiscal years.

The law also required institutions to submit information annually about their local food procurement to the Bureau of Legislative Research. The Bureau of Legislative Research was instructed to submit an annual report to the Governor and the co-chairs of the Legislative Council, or the co-chairs of the Joint Budget Committee, if the General Assembly was in session.

The Bureau of Legislative Research fulfilled the reporting requirements in 2017 and 2018 by sending a form to institutions meeting the definition as defined in the Local Food Act. In 2017, the Bureau of Legislative Research surveyed 130 institutions, and 103 (79.2%) responded. Of the 103 responses, 12 (11.7%) of the institutions reported they met the reporting criteria and 91 (88.3%) of the institutions reported that they did not meet the reporting criteria because they did not receive at least \$25,000 from the state to purchase food or food products. Based on the data received in fiscal year 2017, the median percentage of the food budget that was spent on local farm and food products was 8.0%.

In 2018, the Bureau of Legislative Research surveyed 146 institutions, and 55 (37.7%) responded. Of the 55 responding institutions, 8 (14.5%) met the criteria for reporting and 47 (85.5%) reported that they did not meet the reporting requirements. Based on the data received in fiscal year 2018, the median percentage of the food budget that was spent on local farm and food products was 11.0%. A copy of the 2017 and 2018 Annual Reports can be found on the Department's website at agriculture.arkansas.gov/arkansas-department-of-agriculture-programs/the-local-food-farms-and-jobs-act.

Significant changes were made to the Local Food Act during the 2019 legislative session of the Arkansas General Assembly by Act 796 of 2019. The amendment requires institutions that receive at least \$25,000 a year from the state and offer a food service program to report annually on their local food procurement. It increased the local food procurement goal from 20% of the institution's purchases of food products to be spent on local farm and food products to **at least 20%**.

The amendment expanded the number of institutions required to report by changing the definition of "institution" to include institutes of higher education, childcare facilities, after-school programs, state parks, state agencies, and designees under contract that receive at least \$25,000 a year from the state. Further, it expanded the duties of a program coordinator position to work with distributors and assist producers in gaining access to institutions, distribution networks, and food service operators. Finally, the amendment placed the responsibility to collect and report on local food procurement data with the Arkansas Department of Agriculture and required the annual report to be submitted to the House and Senate Committees on Agriculture, Forestry, and Economic Development. A copy of Act 796 of 2019 can be found on the Department's website at agriculture.arkansas.gov/arkansas-department-of-agriculture-programs/the-local-food-farms-and-jobs-act.

In 2019, the Arkansas Department of Agriculture (Department) partnered with the Access to Healthy Foods Research Group at Arkansas Children's Research Institute and the Office of Community Health and Research at the University of Arkansas for Medical Sciences (UAMS) to prepare the annual report. An online survey was distributed to 1,980 institutions identified as receiving funding from the state at some level. Of the 1,980 who received the survey, 454 (22.9%) completed it. Of those, 176 (38.8%) met the criteria for reporting, and 278 (61.2%) did not meet the criteria for reporting because they did not receive state funding and/or did not operate a food service program. Based on the data received in fiscal year 2019, the median percentage of the food budget spent on local farm and food products was 15.0%.

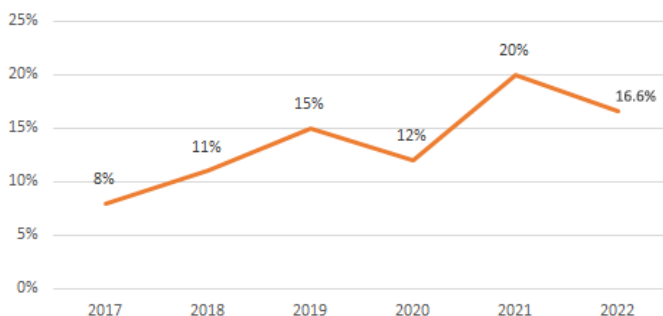

In 2020, the Department partnered with the Office of Community Health and Research at UAMS to prepare the annual report. An online survey was distributed to 2,322 institutions identified as receiving funding from the state at some level. Of the 2,322 institutions who received the survey, 673 (29.0%) completed it. Of those, 352 (52.3%) met the criteria for reporting, and 321 (47.7%) did not meet the criteria for reporting because they did

not receive state funding and/or did not operate a food service program. Based on the data received in fiscal year 2020, the median percentage of the food budget spent on local farm and food products was 12.0%.

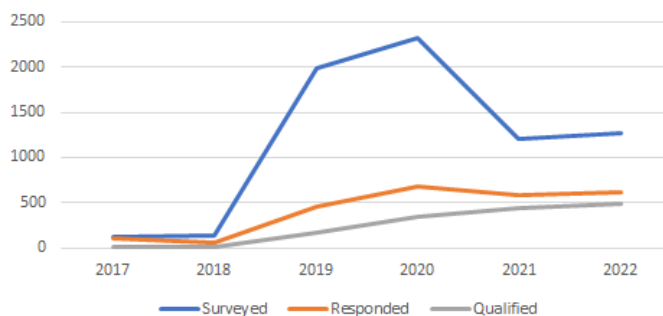

In 2021, in partnership with the Office of Community Health and Research at UAMS, an online survey was distributed to 1,206 institutions identified as receiving funding from the state at some level. Of the 1,206 institutions who received the survey, 579 respondents (48.0%) completed it. Of those, 449 (77.5%) met the criteria for reporting, and 130 (22.5%) did not meet the criteria for reporting because they did not receive state funding and/or did not operate a food service program. Based on the data received in fiscal year 2021, the median percentage of the food budget spent on local farm and food products was 20.2%.

Copies of all previous Annual Reports can be found on the Department's website at agriculture.arkansas.gov/arkansas-department-of-agriculture-programs/the-local-food-farms-and-jobs-act.

Percentage of Budget Spent on Local Food Comparison (median)

Institution Comparison

SUMMARY OF 2022 SUBMITTED REPORTS

In 2022, the Department partnered with the Office of Community Health and Research at UAMS to meet the requirements of the Local Food Act. Beginning early in the year, the Department and UAMS worked to expand awareness and outreach about the Local Food Act by developing resources and providing technical assistance via email, phone, and online resources to institutions and distributors.

The Department and UAMS initiated the 2022 reporting requirements by gathering contact information from the Arkansas Department of Finance and Administration, Arkansas Department of Education, and the Arkansas Department of Human Services for all potentially eligible institutions and to refine the recipient list based on 2021 responses.

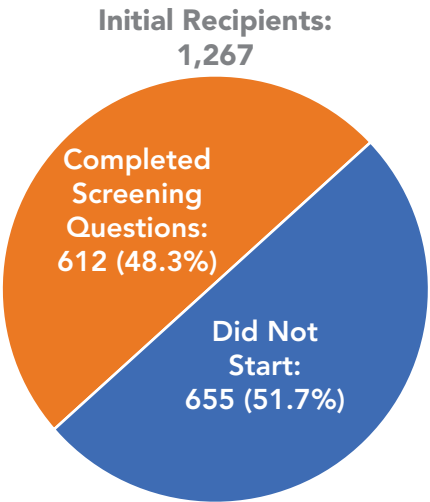

The online survey was updated and reviewed by key stakeholders to improve clarity. On July 25, 2022, it was distributed to 1,267 institutions identified as receiving funding from the state and/or operating a food service program. Institutions were given until October 1, 2022, to complete the survey. The Department provided technical assistance to the institutions via email and phone communications while the survey was open.

In August 2022, the Department launched the updated web page. The web page has information about the Local Food Act, including a Frequently Asked Questions document, an eligibility infographic, a social media and promotion toolkit, and the 2017-2021 Annual Reports. Since the FY2022 reporting form launched, the web page has had a total of 409 pageviews, including 266 unique pageviews with an average view time of 1:08 minutes.

A webinar was hosted on August 9, 2022 to give an overview of the Local Food Act and to facilitate a question-and-answer session. It was attended by 44 people, with 62 registered to attend. The webinar has received an additional 57 views on YouTube. A recording of the webinar and other information was added to the web page at agriculture.arkansas.gov/arkansas-department-of-agriculture-programs/the-local-food-farms-and-jobs-act.

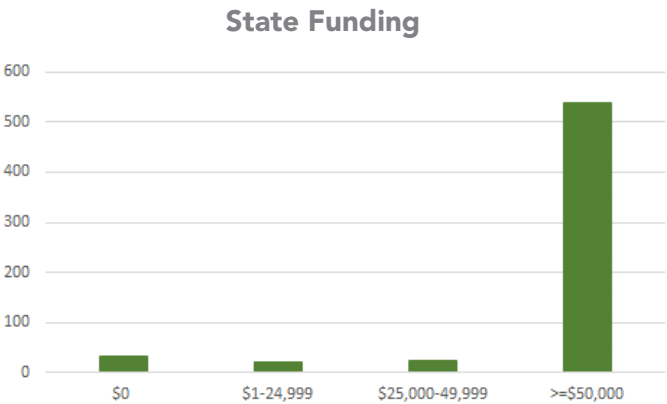

Screening Questions

The goal of the first set of questions was to determine if the recipient met the criteria for reporting on local food procurement. To meet the reporting requirements, institutions must receive at least \$25,000 per year from the state and offer a food service program. Of the 1,267 institutions identified as receiving funding from the state or offering a food service program, 612 respondents (48.3%) completed the screening questions, and 655 (51.7%) institutions did not start the screening questions.

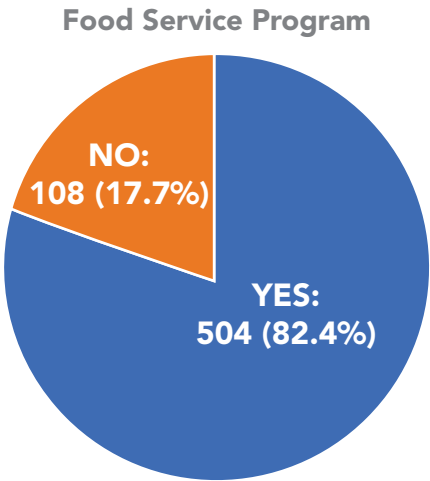

State Funding

The first question asked institutions how much state funding they received in fiscal year 2022, and 612 institutions responded. Of the 612 respondents, 33 (5.4%) reported not receiving any state funding, 20 (3.3%) institutions reported receiving \$1 - \$24,999 in state funding, 25 (4.1%) institutions received \$25,000 - \$49,999 in state funding, and 534 (87.3%) institutions received greater than or equal to \$50,000 in state funding.

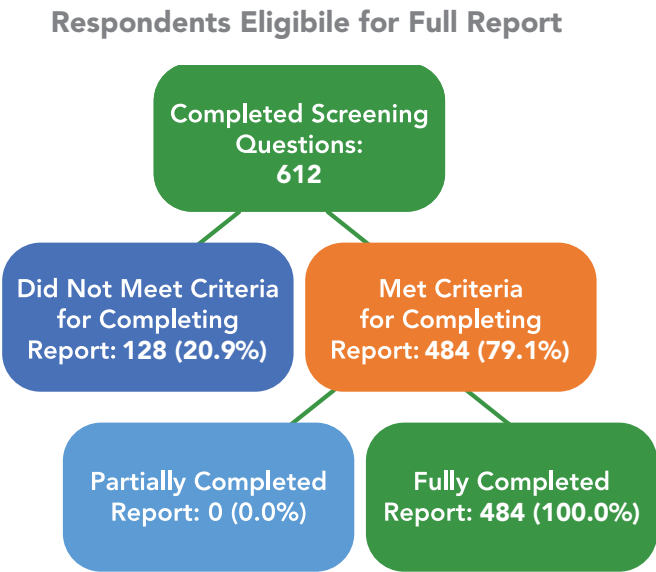

Food Service Program

The second question asked institutions whether or not they offered a food service program, and 612 institutions responded. A total of 504 (82.4%) reported having a food service program, and 108 (17.7%) reported not having a food service program.

Respondents Eligible for Full Report

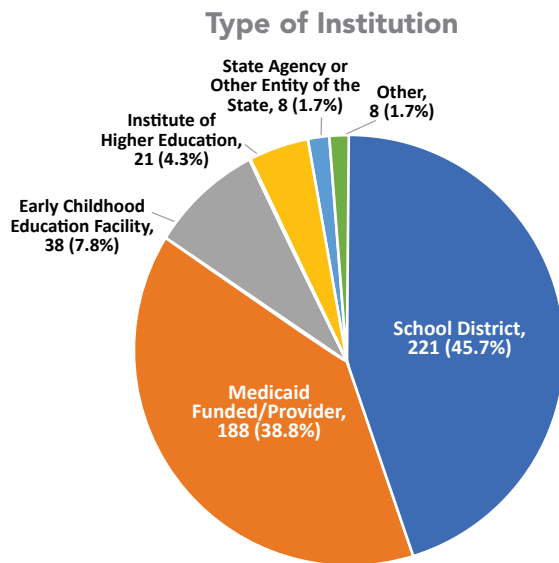

Based on the answers to the state funding and food service program questions, 484 institutions (79.1%) met the criteria for reporting on local food procurement goals and 128 institutions (20.9%) did not meet the criteria for reporting because they did not receive state funding, did not operate a food service program, or both.

Of the 484 respondents who met the criteria for reporting, 484 (100.0%) completed the report by providing both their total food budget and their total local food budget, and answers to some or all additional questions. 73 institutions indicated that they did not purchase local food in FY 2022. 0 (0.0%) institutions partially completed the report.⁴ All information from institutions that both partially completed the report and submitted a complete report was included in the analyses of each question and is reported below. For a complete list of respondents, please see Appendix A.

Type of Institution

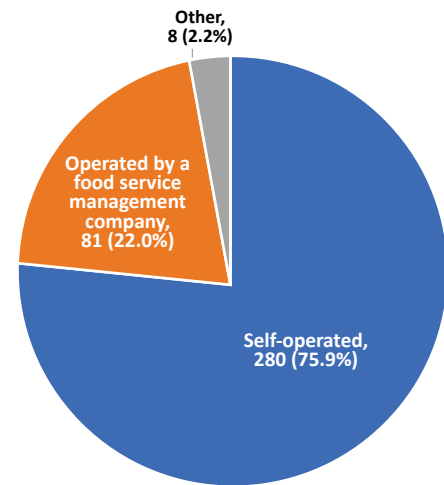

Respondents were asked to classify their institutions based on the categories detailed in the Local Food Act. Of the 484 institutions who met the criteria for reporting, 21 (4.3%) are institutes of higher education, 221 (45.7%) are school districts, 38 (7.8%) are early childhood education facilities, 188 (38.8%) are Medicaid-funded programs and providers, 8 (1.7%) are state agencies, and 8 (1.7%) are other types of institutions, including library systems, out-of-school programs, senior programs, and community programs.

Type of Food Service Program

Institutions were asked to provide information about how their food service program was managed. Of the 369 respondents to this question, 280 (75.9%) self-operate their food service program, 81 (22.0%) use a food service management company, and 8 (2.2%) reported an “Other” category. Some of the other ways food service programs were operated include working with other local partner institutions and a hybrid of self-operation and working with other food service programs.

Type of Food Service Program

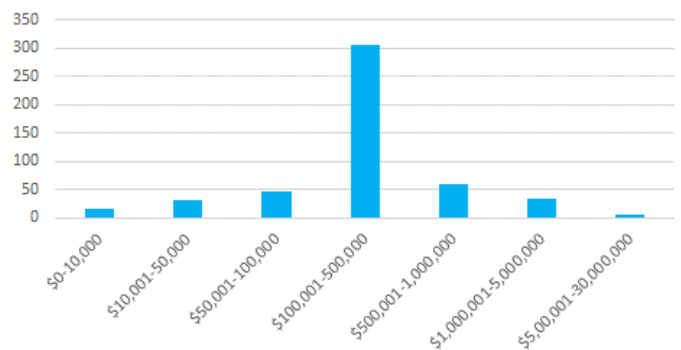

Food and Beverage Procurement

FY2022 Total Food Budget

Institutions were asked to report their annual food budget, and 484 institutions reported their food budget by providing the amount of funding they spent to purchase food products. The responses ranged from spending \$923.00 to \$26,157,999.69 annually with the middle amount (median⁵) of the range at \$229,387.90. All responses together totaled \$241,425,150.00.

FY2022 Total Food Budget

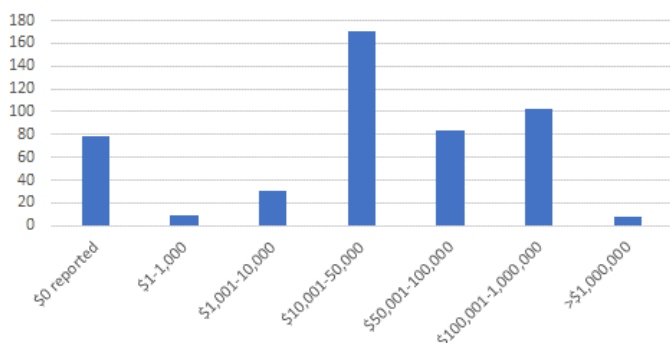

FY2022 Total Local Food Budget

A total of 485 institutions reported the amount of money used to purchase local farm and food products. The responses ranged from spending \$0 to \$8,296,458.50 annually with the median of the range falling at \$37,056.61. All responses together totaled \$53,450,164.00.

4. Responses were considered partially complete if some information was provided but the respondent did not provide both their total and local food budgets.

5. The median is included in this report as a general representation of the central measure or middle number if the values were lined up sequentially from smallest to largest. Mean (also known as average) was not included because of the wide range in the reach and size of the institutions reporting.

FY2022 Local Food Budget

Percentage of FY2022 Total Food Budget Spent on Local Food

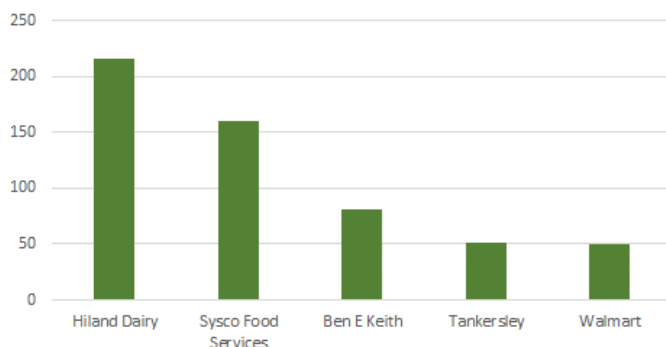

A total of 485 institutions reported their total food budget and dollars spent on local farm and food products. The percentage of dollars spent on local farm and food products was calculated for each institution. The median percentage of dollars spent by institutions on local food was 16.6%. A total of 207 institutions (42.7%) met the Local Food, Farms, and Jobs Act goal of 20% or more of their local food budget for FY2022 being spent on local food.

Local Farm and Food

Vendors

Respondents who reported purchasing local farm and food products were asked to provide a list of vendors from whom they purchased those products. Vendors included distributors, farms, grocers, processors, and others. The most frequently used vendors were Hiland Dairy, Sysco, Ben E. Keith, Tankersley, and Walmart. For a full list of vendors, see Appendix B.

Top Local Farm and Food Vendors

Products

Institutions that reported purchasing local farm and food products were asked to provide a list of the products purchased. The categories reported were vegetables; fruit; dairy; meat, protein, eggs; whole grains, seeds, nuts; non-dairy beverages; fresh herbs; processed and prepared foods; and seasonings, sauces, condiments, and jams. The most commonly reported local farm and food products purchased were chicken, milk, ground beef, and pork. For a full list of products, see Appendix C.

Institution Commitment

Policy Statement

The Local Food Act requires each institution to submit a policy statement signed by the executive head of the institution expressing a commitment to comply with the Local Food Act in the following fiscal year. A total of 341 institutions submitted the required policy statement. The policy included the local procurement goal of “at least twenty percent (20%) of the institution’s purchases of food products is spent on local farm and food products.” For a full list of those who submitted a policy statement, see Appendix A.

Local Vendor Preference for FY2023

Institutions were asked how they plan to meet their local procurement goals. They were able to select their vendor preference from a list of multiple categories, and 485 institutions responded. Of those, 363 (74.9%) indicated they intend to purchase local through their wholesale distributor like Sysco or Ben E. Keith, 133 institutions (27.4%) intend to work directly with a producer/grower/farmer/processor, 97 (20.0%) reported wanting to work with a food hub, 30 (6.2%) reported wanting to work with a cooperative, and 25 (5.2%) reported they intend to grow products on-site. Additional answers included examples such as utilizing local farms and working with local vendors, distributors, and food banks to identify local products.

Local Food Preference for FY2023

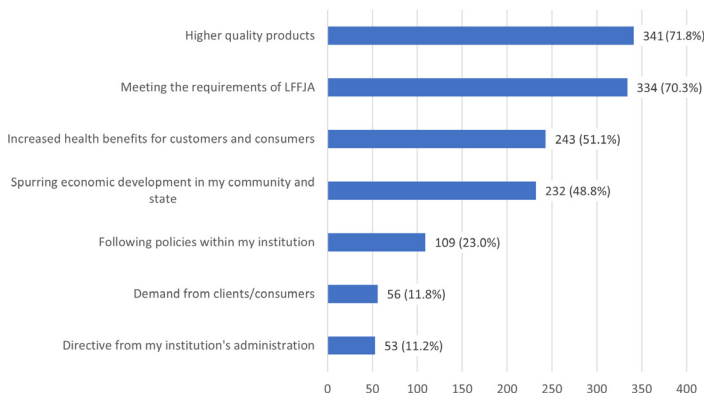

Institutions were asked what product categories they were interested in purchasing. They were able to select their food preferences from a list of multiple categories, and 465 institutions responded. The results are as follows: 373 (80.2%) were interested in vegetables, 348 (74.8%) in dairy, 309 (66.5%) in fruit, 305 (65.6%) in meat, 192 (41.3%) in processed and prepared foods, 149 (32.0%) in grains, 110 (23.7%) in seasonings, sauces, condiments, and jams, 62 (13.3%) in fresh herbs, and 0 (0.0%) in non-dairy beverages.

Motivators and Barriers

Motivators for Purchasing Local Food

Respondents were asked to select their top three motivators for procuring local farm and food products, and 475 responded. Of those, 341 (71.8%) identified higher quality products, 334 (70.3%) identified meeting the requirements of the Local Food Farms and Jobs Act, 243 (51.1%) identified increased health benefits for their consumers and customers, 232 (48.8%) identified spurring economic development in their community and state, 109 (23.0%) identified following policies within their institutions, 56 (11.8%) identified demands from clients/customers, and 53 (11.2%) identified directive from their institution's administration as motivators for purchasing local foods.

Motivators

Barriers to Purchasing Local Food

Respondents were asked to select their top three barriers to procuring local food and farm products, and 476 responded. Of those, 282 (59.2%) identified higher costs for local food and/or farm products, 265 (55.7%) identified a lack of supply to meet their needs, 249 (52.3%) identified a lack of information about where to purchase local food and/or farm products, 165 (34.7%) identified COVID-19 and the resulting supply chain issues, 146 (30.7%) identified lack of clearly labeled local farm and/or food products from their distributor, 101 (21.2%) identified a lack of knowledge about how to purchase local food and/or farm products, 100 (21.0%) identified an inability to justify purchasing local food and/or farm products over comparable non-local products, and 32 (6.7%) identified that food purchased locally does not meet the food safety requirements of their program as barriers to purchasing local food.

Barriers

Facilitators to Procuring Local Foods

Institutions were asked to select which tools helped facilitate procuring local foods in FY2022, and 386 institutions responded. Of those, 196 (50.8%) identified positive relationships and communication with procurement partners, 155 (40.2%) identified successful past local purchasing, 94 (24.4%) identified institutional policies and contracts that support local purchasing, 68 (17.6%) identified the Arkansas Department of Agriculture's local food act infographic, 34 (8.8%) identified the Local Food, Farms, and Jobs Act annual reports from previous years, and 31 (8.0%) identified the Local Food, Farms, and Jobs Act informational webinars provided by the Arkansas Department of Agriculture as facilitators in purchasing local foods.

CONCLUSION

The Local Food, Farms, and Jobs Act (Local Food Act) is a “farm to institution” policy, which aims to increase the purchase of locally grown and processed food products in institution-based food service programs across the state of Arkansas.

Procuring products from within the state spurs local economic development by engaging Arkansas farms and producers. In addition, farm to institution practices can provide healthier, fresher food choices to students, employees, and others eating in these institutions while also engaging and educating consumers about the value of eating healthy, local food. Potential benefits of farm to institution practices range from creating a stable market for local products, increasing participation in meal programs, and increasing community awareness of local farming and food systems.

Based on the fiscal year 2022 data, the Arkansas Department of Agriculture (Department) will work to respond to the motivators, barriers, and facilitators identified by institutions. The 2023 goals for the Department, in partnership with the Office of Community Health and Research at the University of Arkansas for Medical Sciences (UAMS), are:

- Continue to refine the identification of which institutions in the state meet the eligibility requirements for reporting based on receiving at least \$25,000 from the state and offering a food service program;
- Continue to improve the reporting instrument based on key stakeholder feedback;
- Provide technical assistance to institutions, distributors, food hubs, and producers;
- Develop lists, resources, and tools that connect institutions to the local supply chain;
- Work with distributors to help them identify and market local farm and food products; and
- Work with farmers and producers to connect them to distributors, food hubs, and institutions.

Beyond the Local Food Act, the Department’s support for farm to institution includes a Farm to School and Early Childhood Education Program and the Arkansas Grown, Arkansas Made, and Homegrown by Heroes branding programs. The Department will continue to commit staff to support efforts to: 1) deepen our understanding of the stakeholder needs of farmers, aggregators, processors, distributors, institutional buyers, and consumers; 2) foster and support this network; and 3) share best practices identified in our state and across the country.

The Department is honored to support the goals of the Local Food Act and is pleased to submit the Local Food, Farms, and Jobs Act 2022 Annual Report. The Department appreciates the assistance from our partners who provided contact information for institutions and support with developing, administering, and analyzing data from the online survey to make this report possible.

For more information about the report, please contact Erica Benoit or Karen Reynolds at the Arkansas Department of Agriculture.

APPENDIX A: RESPONDENTS

The Local Food, Farms, and Jobs Act (Local Food Act) requires a list of respondents to be identified and publicly listed. A total of 612 institutions responded to the screening questions that determined their eligibility to complete a full report. A total of 484 (79.1%) institutions met the criteria for full reporting, and 128 (20.9%) did not meet the criteria.

Respondents indicated their institution type and institutions are listed below based on the type they self-selected. Institutions who met the criteria are further broken down into completing a full report or partially completed report group.

Institutions who submitted a signed policy statement outlining their commitment to local food procurement have an asterisk (*) next to their name below. For a full list of non-responders, please contact LFFJAHelp@arkansas.gov.

Institutes of Higher Education

This institution group includes colleges and universities. A total of 31 institutions responded to the screening questions. Of the 31 respondents, 21 (67.7%) were eligible to complete the full report, and 10 (32.3%) did not meet the criteria for full reporting.

Met Criteria for Full Reporting (Complete Reports)
