★★★Stockpiles with 15%, 20%, 25% & 33% Chert Available; If used for wearing course, requires less non-limestone coarse aggregate

★★Stockpiles with 27% Chert Available; If used for wearing course requires less non-limestone coarse aggregate.

★Additional testing for soundness will be required for any material incorporated into an ARDOT project. Testing will be the responsibility of the Contractor at the frequency determined by the Department

Steel Slag may be used for Mineral Aggregate, Base Course (CI 1 & 2), or Rip Rap.

This is a list of currently qualified aggregate material sources and their potential uses.

Aggregate sources are required to be tested on a yearly basis to maintain this qualification.

The listing of a material source on the QPL will in no way relieve the contractor or supplier of furnishing material meeting the specification.

If there are questions concerning the list, contact the materials division at (501) 569-2187.
