

INTEROFFICE MEMORANDUM

November 27, 2024

TO: Master Files

FROM: *for* Josh Seagraves, Division Head – Environmental *KJB*

SUBJECT: 2025 Pavement Preservation Program Projects
Multiple Jobs and FAPs
Various Counties
Tier 1 Categorical Exclusion

After appropriate environmental review, it has been determined that the subject jobs are a Tier 1 Categorical Exclusion as described by the ARDOT/FHWA Programmatic Agreement on Categorical Exclusion Documentation and Processing. A public hearing will not be offered for these projects.

The purpose of these projects is to preserve and rehabilitate the highways. The attached table lists the projects, their locations, and type of work. Project location maps and cultural resources clearances are also attached.

The projects would not involve relocations, Important Farmlands, wetlands, underground storage tanks, hazardous materials, environmental justice populations, or cultural resources. This project has been determined to generate minimal air quality impacts for Clean Air Act criteria pollutants and has not been linked with any special mobile source air toxics concerns. Cultural resources clearances are attached.

The attached official species lists obtained through the U.S. Fish and Wildlife Service Information for Planning and Consultation website identified the following species as potentially occurring within the project area: Gray Bat (*Myotis grisescens*), Indiana Bat (*Myotis sodalis*), Northern Long-eared Bat (*Myotis septentrionalis*), Tricolored Bat (*Perimyotis subflavus*), Ozark Big-eared Bat (*Corynorhinus townsendii ingens*), Eastern Black Rail (*Laterallus jamaicensis ssp. jamaicensis*), Piping Plover (*Charadrius melodus*), Rufa Red Knot (*Calidris canutus rufa*), Ivory-billed Woodpecker (*Campephilus principalis*), Red-cockaded Woodpecker (*Picoides borealis*), Alligator Snapping Turtle (*Macrochelys temminckii*), Ozark Hellbender (*Cryptobranchus alleganiensis bishopi*), Ozark Cavefish (*Amblyopsis rosae*), Curtis Pearlymussel (*Epioblasma curtisii*), Arkansas Fatmucket (*Lampsilis powellii*), Pallid Sturgeon (*Scaphirhynchus albus*), Fat Pocketbook (*Potamilus capax*), Neosho Mucket (*Lampsilis rafinesqueana*), Ouachita Fanshell (*Cyprogenia sp. cf. aberti*), Ouachita Rock Pocketbook (*Arcidens wheeleri*), Pink Mucket (*Lampsilis abrupta*), Rabbitsfoot (*Theliderma cylindrica*), Scaleshell Mussel (*Potamilus leptodon*), Western Fanshell (*Cyprogenia alberti*), Winged Mapleleaf (*Quadrula fragosa*), Snuffbox Mussel (*Epioblasma triquetra*), American Burying Beetle (*Nitrophorins americanus*), pondberry (*Lindera melissifolia*), Missouri bladderpod (*Physaria filiformis*), Benton County Cave Crayfish (*Cambarus aculabrum*), Western Regal Fritillary (*Argynnis idalia occidentalis*), and

Monarch Butterfly (*Danaus plexippus*). The projects would have “no effect” on all listed species due to the limited scope of the action, lack of suitable habitat, and distance to known species locations.

The Alligator Snapping Turtle and the Western Regal Fritillary are proposed threatened species; the Monarch Butterfly is a candidate species; and the Tricolored Bat is a proposed endangered species. The proposed projects would not jeopardize the continued existence of these species.

These projects would not have a discharge of dredged or fill material into Waters of the United States. A Section 404 permit will not be required.

INTEROFFICE MEMORANDUM

November 20, 2024

TO: Environmental Job File

FROM: Jason Kennedy, Cultural Resources

A handwritten signature in black ink, appearing to read 'JK', is placed over the 'FROM' line.

SUBJECT: Cultural Resources Clearance
Job A10044
I-40 – Hwy. 50 (Widener) (S)
Route 38, Section 5
St. Francis County

This job proposes 2.45 miles of Patching, Leveling and 2" Overlay, as well as 2-foot shoulders, along Highway 38 between Log Mile 0.000 at Interstate 40 and Highway 50, in Widener, St. Francis County. No new right-of-way (ROW) will be acquired. All work will occur within the existing roadway.

A records check at the Arkansas Archeological Survey shows no sites in or near the proposed project. No historic structures were shown on the Arkansas Historic Preservation Program's structure database that are eligible or listed on the National Register of Historic Places near the project. No cultural indicators were found on the 1857 GLO plat near the project. The 1936 St. Francis County General Highway and Transportation map shows several structures along the existing highway.

Available plans, the topography, and previous infrastructure were examined to assess previous ground disturbance. All work will be within the existing ROW, and the limited scope of the project occurs within previously disturbed areas (highway construction). This type of undertaking will not affect historic properties. This project requires no Section 106 review under Appendix B, Activity 2, of the 2024 Amended Programmatic Agreement.

INTEROFFICE MEMORANDUM

August 30, 2023

TO: Environmental Job File

FROM: Jason Kennedy, Cultural Resources Section

SUBJECT: Cultural Resources Clearance
Job 110787
Hwy. 38 – Hwy. 79 (S)
Route 50, Section 1
St. Francis County

The project proposes to level up, overlay, and add 2' Shoulders on 14.58 miles of Highway 50 from the Log Mile 6.857 to the Log Mile 21.436, the Crittenden County line in St. Francis County. No new right-of-way (ROW) will be acquired. Shoulders will be added on each side of the highway on the flat, grassy area between the road and ditches in the existing ROW.

A records check of the Arkansas Archeological Survey's database showed seven archeological sites near the proposed project area. Site 3SF97 is pre-historic, and Sites 3SF282, 3SF290, and 3SF332 are multi-component, and Sites 3SF335 to 3SF337 are historic. All sites were identified during bayou surveys outside of the ROW and will not be impacted.

Based on records check of Arkansas Historic Preservation Program's database for National Register of Historic Places (NRHP) properties, no previously recorded historic structures are located on or adjacent to the proposed project area. Two cemeteries, the New Home Cemetery and Shiloh Cemetery are located outside the project area. Both are shown on the 1940 Whitmore, AR topo map as outside of the ROW by at least 60 feet.

Nineteenth through twentieth century maps were examined. Both the 1823, General Land Office plat maps of Township 5 North, Range 6 East and the

Cultural Resources Clearance

Job 110787

Page 2 of 2

1825 plat maps of Township 5 North, Range 5 East showed no cultural resources in the vicinity of the project area. The 1936 St. Francis County map show numerous structures along the project area. Bridges M3290 and M3330 – M3333 are 45 years of age or older and are within the project area. All were evaluated as not eligible to the NRHP. Bridges M3290 and M3331 were previously evaluated as not eligible under jobs 110617 and 110717 (AHPP Tracking Number 99732 and 103907). The Advisory Council on Historic Preservation's Program Comment on post-1945 concrete and steel bridges (77 FR 68790) applies to Bridges M3330, M3332, and M3333. Those three bridges have been determined not eligible for inclusion to the NRHP in the *NRHP Eligibility Determination Report: Pre-1976 Arkansas Historic Highway Bridge Inventory* under Job 012356.

The existing topography, aerial imagery, previous infrastructure and construction practices were examined to assess previous ground disturbance. This type of undertaking will not affect historic properties. All work will be within the existing ROW, and the scope of the project occurs within previously disturbed areas. Therefore, this project requires no Section 106 review under Appendix C, Activity 2, of the 2021 Programmatic Agreement.

SUBJECT: Cultural Resources Clearance
Job A10047
Bruin Rd. – Hwy. 147 (S)
Route 131, Section 2
Crittenden County

This job proposes 8.811 miles of 2" Overlay and 2-foot shoulders along Highway 131 between Bruin Road and Highway 147, in Crittenden County. No new right-of-way (ROW) will be acquired. All work will occur within the existing roadway.

A records check at the Arkansas Archeological Survey shows no sites in or near the proposed project. No historic structures were shown on the Arkansas Historic Preservation Program's structure database that are eligible or listed on the National Register of Historic Places near the project. No cultural indicators were found on the 1825 and 1841 GLO plats near the project. The 1936 Crittenden County General Highway and Transportation map shows several structures along the existing highway.

Available plans, the topography, and previous infrastructure were examined to assess previous ground disturbance. All work will be within the existing ROW, and the limited scope of the project occurs within previously disturbed areas (highway construction). This type of undertaking will not affect historic properties. This project requires no Section 106 review under Appendix B, Activity 2, of the 2024 Amended Programmatic Agreement.

INTEROFFICE MEMORANDUM

November 20, 2024

TO: Environmental Job File

FROM: Jason Wilhelmi, Cultural Resources

JW

SUBJECT: Cultural Resources Clearance
Job A30041
Hwys. 29 & 160 Impvts.
(Lafayette Co.) (S)
Route 29, Section 1
Route 160, Section 2
Lafayette County

This job proposes to add 2-inch asphalt overlay on Highways 29 and 160 and add 2-foot shoulders to Highway 160, totaling 13.39 miles, in Lafayette County. No new right-of-way (ROW) or temporary construction easements (TCE) will be required.

The records review of the Arkansas Archeological Survey's (ARAS) database found that there are 2 sites (3LA0354 and 3LA0356) recorded near, adjacent to, or potentially in the Highway 29 ROW corridor and 1 site (3LA0278) near the Highway 160 ROW corridor. The ARAS database found Historic CCC Camp Bradley (3LA0356) and auxiliary tower (3LA0354) near the Highway 29 ROW corridor. Both sites have been destroyed. Site 3LA0278 is overgrown and consists of a log barn (destroyed), a barn with a tin roof surrounded by privet, and a gate, and located near the Highway 160 ROW corridor. The barn is not eligible for the NRHP.

The records review of Arkansas Historic Preservation Program's (AHPP) database contained no documentation of any properties near the project.

Other records reviewed included the 1823, 1854, and 1855 General Land Office (GLO) plats of T18S, R24W and the 1823 and 1855 GLO plats of T19S, R24W. The 1936 Lafayette County General Highway and Transportation map and the following topographic maps were also reviewed: the 1952 and 2024 7.5' Canfield, AR and the 1952 7.5' Bradley Southeast, AR.

The GLO plats depicted what appears to be the Red River in western Lafayette County, but cultural features. The 1936 Lafayette County General Highway and Transportation map showed a few structures concentrated in the vicinity of the cities of Bradley and Canfield, but few others elsewhere. There was also a church with a cemetery off Highway 160. This church and cemetery are also shown on the 1952 Bradley Southeast quad

map. The 1952 Canfield quad map showed a Lookout Tower (possibly 3LA0354). This tower is not shown on the 2024 Canfield quad map.

The existing topography, aerial imagery, previous infrastructure and construction practices were examined to assess previous ground disturbance. All work will be within the existing ROW, and the scope of the project occurs within previously disturbed areas (highway construction). Therefore, this project is exempt from additional Section 106 review under Appendix B, Activity 2, of the 2024 Amended Programmatic Agreement.

INTEROFFICE MEMORANDUM

May 21, 2024

TO: Environmental Job File
M H

FROM: Milton Hughes, Cultural Resources

SUBJECT: Cultural Resources Clearance
Job A70034
Hwy. 82 – Hwy. 98 (S)
Route 79, Section 2
Columbia County

This job proposes to add 1-inch asphalt overlay with spot patching and spot leveling to 5.4 miles of Highway 79 in Columbia County. Bridge Number 01978 spans the St. Louis Southwest RR at L.M.3.67 and is listed on the National Register of Historic Places.

The records review of the Arkansas Archeological Survey's (ARAS) database found that the closest documented archeological site is located about ¼-mile west of the project. The Arkansas Historic Preservation Program's (AHPP) database shows Bridge 01978 (CO0555 - the McNeil Overpass). The maintenance/improvement activities associated with the project will be limited to the existing bridge travel surfaces only and will not affect the integrity or alter significant structural elements of the bridge.

No evidence of traces, paths, roads, fields, or any other notation of cultural features were identified on the General Land Office plat of Township 16 South, Range 20 West. The 1936 Columbia County highway map shows that the current alignment of the highway was not yet in place and only a few structures and an unimproved road were noted in or near what was to become Highway 79.

The 1968 7.5' Magnolia, ARK topographic map shows the existing highway in place and only a few structures located along the project limits. Aerial imagery from 1956, 1963, and 1983 did not identify any potential historic properties along the route. The original construction and subsequent improvements to Highway 79 in the project area would have destroyed any evidence of the unimproved road or houses noted on the 1936 map.

The existing topography, known construction practices, utilities, and plans were examined to assess previous ground disturbance. All work will take place on existing paved surfaces, and no intact ground will be impacted. No new ROW or TCE will be required. This type of undertaking will not affect historic properties. Therefore, this project requires no Section 106 review under Appendix C, Activity 15, of the 2021 Programmatic Agreement.

RE: Dallas County: General
Section 106 Review: FHWA
Proposed Undertaking: Princeton – Hwy. 79B (S)
Route 8, Section 7
ArDOT Job Number: A70035
AHPP Tracking Number: 112412

Dear Mr. Seagraves:

The staff of the Arkansas Historic Preservation Program (AHPP) has reviewed the submission for the above-mentioned project in multiple sections, Township 10 South, Range 13 West in Dallas County, Arkansas west of Fordyce. The project proposes to add a 2-inch asphalt overlay with spot patching and spot leveling on 18.41 miles of Highway 8. There are many previously recorded archeological sites near the area of potential effect. Nine of these include General Land Office (GLO) agricultural fields. Nine historic structures are located in or near the APE, one of which is listed on the National Register of Historic Places (NRHP) and three that are eligible for inclusion in the NRHP. All work will occur within the current right-of-way (ROW) and on existing pavements. No new ROW or temporary construction easements (TCE) are needed.

Based on the provided information, the AHPP concurs with the finding of **no historic properties affected pursuant to 36 CFR § 800.4(d)(1)** for the proposed undertaking. In the event of a post-review discovery of historic properties within the area of potential effects, please contact the AHPP and other consulting parties in accordance with 36 CFR § 800.13(b)(3).

Thank you for the opportunity to review this submission. Please refer to the AHPP Tracking Number listed above in all correspondence. If you have any questions, please call Jessica Cogburn of my staff at 501-324-9357 or email jessica.cogburn@arkansas.gov.

Sincerely,

Jessica H.

INTEROFFICE MEMORANDUM

November 19, 2024

TO: Environmental Job File

FROM: Milton Hughes, Cultural Resources
M H

SUBJECT: Cultural Resources Clearance
Job A70036
Nevada County Line – Hwy. 53 (S)
Route 67, Section 4
Clark County

This job proposes to level up and add 2-inch asphalt overlay with spot patching to 9.12 miles of Highway of Highway 67 in Clark County. Bridge 01381 is slated for surface rehabilitation. No new right-of-way (ROW) or temporary construction easements (TCE) will be required.

The records review at the Arkansas Archeological Survey's (ARAS) database found that there are no sites recorded near, adjacent to, or potentially in the Highway 67 ROW corridor. The Arkansas Historic Preservation Program's (AHPP) database contained documentation of 4 properties near the project including one listed bridge (CL0949) that spans the Little Missouri River, two properties (CL0897 and CL0880) with unknown NRHP eligibility status and one property (CL0429) that is not eligible. Bridge Number 01381 spanning the Little Missouri River is listed on the National Register of Historic Places and is slated for surface rehabilitation. None of the noted properties will be adversely affected by the project.

Records reviewed included the 1858 General Land Office (GLO) plat of T9S, R20W; the 1855 GLO plat of T9S, R21W; the 1844 GLO plat of T10S, R21W; and the 1837 and 1857 GLO plats of T10S, R22W. The 1936 Clark County highway map and the following topographic maps were also reviewed: the 1901 30' Gurdon, AR, the 1970 7.5' Gurdon, ARK and the 1970 7.5' Okolona South, ARK. Aerial imagery dating to 1956, 1968, and 1983 was also reviewed.

The 1844 GLO plat showed roads crossing what would eventually become the Highway 64 corridor. Highway 64 was not in existence in 1901 and only a few scattered structures were noted in or near the project on that topographic map. Numerous structures were noted along the highway on the other topographic map resources, the 1936 Clack County highway map and aerial imagery.

The existing topography, aerial imagery, previous infrastructure and construction practices were examined to assess previous ground disturbance. All work will be limited to existing paved surfaces and no archeological sites or historic properties will be affected by this resurfacing project. This project is

subject to the 2024 Amended Programmatic Agreement and falls under Activities 2 and 12 of Appendix B.
The project is exempted from further work or Section 106 review.

Job A00073
Hwy. 49Y, 358 & 412B Impvts. (Paragould) (S)
Route 49, Section 2Y
Route 358, Section 1
Route 412, Section 9B
Greene County

This job proposes 8.09 miles total of mill and inlay on Highway 49, level up and 2" overlay on Highway 358, and 2" mill and 2" overlay on Highway 412 in Greene County. Work will be completed on Highway 49 between Highway 412 and South 15th Street in Paragould; on Highway 358 between the intersection of Highway 49 and Highway 358 to the intersection of Highway 358 and Highway 351; and on Highway 412 between the intersection of South 15th Street and Highway 412 to the intersection of Highway 412 and South 14th Street in Paragould.

This project is subject to the 2021 Programmatic Agreement and falls under Activity C in Appendix B. The project is exempt from further work or Section 106 review.

INTEROFFICE MEMORANDUM

November 19, 2024

TO: Environmental Job File

FROM: Shelby Linck, Cultural Resources Section *SL*

SUBJECT: Cultural Resources Clearance
Job A00075
Hwy. 63 – Hwy. 67 (S)
Route 412, Sections 6B and 7
Lawrence County

This job proposes 6.74 miles of 2" mill and 2" overlay on Highway 412 in Lawrence County. Work will be completed on Highway 412 between Highway 140, the intersection of Highways 412 and 63 (log mile 0.000), and near the intersection of Highways 412 and 67 (log miles 0.000, 6.668, and 0.067).

This project is subject to the 2024 Amended Programmatic Agreement and falls under Activity C in Appendix A. The project is exempt from further work or Section 106 review.

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

<https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf>

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts see <https://www.fws.gov/program/migratory-bird-permit/what-we-do>.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures see <https://www.fws.gov/library/collections/threats-birds>.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit <https://www.fws.gov/partner/council-conservation-migratory-birds>.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

ENDANGERED SPECIES ACT SPECIES

There is a total of 25 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

-
1. [NOAA Fisheries](#), also known as the National Marine Fisheries Service (NMFS), is an office of the National Oceanic and Atmospheric Administration within the Department of Commerce.

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

<https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf>

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts see <https://www.fws.gov/program/migratory-bird-permit/what-we-do>.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures see <https://www.fws.gov/library/collections/threats-birds>.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit <https://www.fws.gov/partner/council-conservation-migratory-birds>.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

<https://www.fws.gov/sites/default/files/documents/endangered-species-consultation-handbook.pdf>

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts see <https://www.fws.gov/program/migratory-bird-permit/what-we-do>.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures see <https://www.fws.gov/library/collections/threats-birds>.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit <https://www.fws.gov/partner/council-conservation-migratory-birds>.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

PROJECT SUMMARY

Project Code: 2025-0017218

Project Name: April 2025 Pavement Preservation

Project Type: Road/Hwy - Maintenance/Modification

Project Description: Pavement Preservation

Project Location:

The approximate location of the project can be viewed in Google Maps: <https://www.google.com/maps/@36.35141845,-93.53109326207459,14z>

Counties: Arkansas

ENDANGERED SPECIES ACT SPECIES

There is a total of 16 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

-

Project Name: Miscellaneous 2025 Pavement Preservation

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)(c)). For projects other than major construction activities, the Service suggests that a biological

evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:
