SAFETY INITIATIVES PROGRAMS & POLICIES

10-POINT BEST PRACTICE PLAN FOR RESPONDING TO DEBRIS REMOVAL

-  **1** Turn on warning lights as you approach debris.
-  **2** Park in advance of debris on shoulder closest to debris, as far from traffic as possible.
-  **3** Always use a spotter on roadways that are High-Speed (65MPH) or Moderate to High-Volume.
-  **4** Consider whether the hazard warrants the danger involved in removing the hazard.
-  **5** Keep an eye on and face on-coming traffic, **NEVER** turn your back on traffic.
-  **6** If the hazard in the travel lane can be removed from the shoulder with a tool, use tool during an adequate gap in traffic.
-  **7** When High-Speed (65 MPH) and High-Volume Traffic exists, **NEVER** enter or cross a live lane of traffic for any reason.
-  **8** If conditions warrant entering the live lane, **WAIT** until certain you have time to walk to get object, not run, and walk back to safety.
-  **9** Avoid crossing more than one lane of traffic.
-  **10** If in doubt, **DON'T GO**. Use a mobile lane closure or truck mounted device to remove debris from live lanes, especially on multi-lane freeways.

REPORT SAFETY CONCERNS

We want your voice to be heard. Employees should report concerns to the Safety Section.

SAFETY INITIATIVES

AUTOMATED FLAGGER

Guardian SmartFlagger

The future of traffic control

The Guardian SmartFlagger is the only Smart Automated Flagger Assistance Device (AFAD) of its kind. It is controlled within the work zone and provides an overall safer environment using LAN technology, recorded video surveillance, and traffic-rerouting with Waze. Together with our partners, we are significantly increasing motorist compliance and work zone safety all across North America.
