This page and the next contain statewide caseload information for ACC. Caseloads are presented separately for regular parole and probation, specialty court, and specialized caseloads. This version is specifically designed for quarterly legislative reporting and differs from the daily caseloads/workloads report.

Beyond the exclusion of workloads calculation, it is important to note that direct supervision in these tables includes regular parole and probation and specialty court (including regular parole and probation offenders carried by specialty court officers) offenders with active (direct), electronic monitoring, or incarceration supervision status, as well as absconders assigned to SRT officers. Offenders on annual supervision are counted as indirect.

Caseloads are presented in distinct officer groupings:

Regular: These are officers carrying normal Probation and Parole caseloads.

Specialty Court: These officers supervise offenders in specialty courts. Note that these officers may also carry regular P/P offenders, and these offenders are reflected in the specialty court caseload/workload figures; however, separate caseload/workload ratios are calculated for the regular and specialty court portions of a specialty court officer's caseload, in addition to a combined, or mixed, ratio.

Specialized: These officers supervise strategically specialized caseloads consisting of offenders requiring heightened supervision protocols (intensive supervision) and parolees who have absconded supervision (Special Response Team).

Indirect: These are offenders for whom their sentence, circumstance, or current status is associated with a reduced supervision obligation for the officers they are assigned to. Generally, these include offenders in non-reporting status, those on suspended sentences (SIS), and interstate compact offenders. Offenders on annual supervision are also included in this group.
