

Now you can see your family and friends more often.

Our next-generation video calling service – on-demand Video Connect – is available at your facility, so you can video-call your loved ones face-to-face in REAL TIME when it’s convenient... and when it matters most.

Just ask your family and friends to download the Securus Mobile app, then set up Video Connect and AdvanceConnect to enjoy flexible facetime with you... directly on their mobile devices!

Video Connect gives you:

- **On-demand calling** – You decide when to make video calls, just like phone calls; there’s no need for loved ones to schedule sessions in advance.
- **Savings** – With a simple pay-per-minute system, calls are only billed for the time you’re connected.
- **AdvanceConnect budgeting** – Your family and friends can set up prepaid accounts with balance alerts and autopay so they never miss a video call from you.
- **Calling without limits** – Pending facility guidelines, there’s no cap on the number of video calls you can make each day!

Video Connect lets you:

- Join in singing “Happy Birthday” at parties,
- Read bedtime stories to little ones,
- Enjoy live sporting events together,

...and much more – so you don’t miss out on life’s special occasions, or even everyday events, regardless of distance.

Welcome to Video Connect!
